

MACHINE LEARNING & AI

WEEK 2 – Supervised Learning (Regression & Classification)

 **Focus: Model building, training, accuracy testing**

 **Topics Covered:**

- Linear Regression
- Logistic Regression
- Decision Tree, Random Forest
- Accuracy metrics (MSE, R^2 , Confusion Matrix)

Assignments:

1. Build Linear Regression model on housing dataset (predict price).
2. Train Logistic Regression on Titanic dataset for survival prediction.

Mini Project 2: **“House Price Prediction Model”**

Dataset: [Kaggle – House Prices Dataset](#)

Tasks:

- Train Linear Regression model
- Predict house prices
- Evaluate R^2 score
- Plot predicted vs actual values
